EDUCATION

University of Michigan

Aug. 2024 – Dec. 2027

Bachelors of Engineering in Computer Science

Ann Arbor, MI

- **Relevant Coursework:** Data Structures & Algorithms, Computer Vision (In progress), Applied Linear Algebra, Discrete Math, Intro to Computer Architecture (In progress)

WORK EXPERIENCE

Full Stack Developer Intern

Feb 2026 – May 2026

Altheros Capital

Ann Arbor, MI

- Refining responsive landing pages and interfaces with JavaScript and CSS, ensuring high-fidelity **Figma** alignment.
- Translating user stories and participating in **Scrum** sprint planning for UI enhancements.
- Meeting with Project Managers and Leads to coordinate project scope and ensure timely delivery of features.

Embedded Systems Developer

Jan. 2025 – Apr. 2025

University of Michigan

Ann Arbor, MI

- Prototyped a functional underwater Remotely Operated Vehicle (ROV) optimized for aquatic exploration.
- Architected a **custom C++ control system** and integrated a physical controller to manage 3-axis propulsion.
- Articulated a technical demonstration detailing hardware-software integration for stakeholders.

Machine Learning Research Assistant (PeARL Lab)

May 2023 – Aug. 2023

University of Massachusetts-Lowell

Lowell, MA

- Optimized **robotic arm pathfinding** and object manipulation through the engineering of ML models.
- Streamlined data collection pipelines using Python, significantly reducing preparation time for researchers.
- Deployed **control scripts** that increased the success rate of robotic "pick and place" operations.

Machine Learning Engineer (Beaver Works)

Jul. 2023 – Aug. 2023

MIT / Lincoln Laboratory

Cambridge, MA

- Programmed **autonomous navigation** using OpenCV to track pool lane lines in real-time.
- Synthesized **AprilTag detection** data to calculate relative 3D position and heading between units.
- Tuned **PID controllers** to stabilize robot orientation, resulting in smoother trajectory tracking.

PROJECTS + LEADERSHIP

Full Stack Developer (CMU TartanHacks 2026) | *React, Expo, Node.js*

Feb 2026

- Engineered a gamified financial dashboard with an AI-driven pet system and real-time quest overlays.
- Constructed a **TypeScript** onboarding engine parsing CapitalOne's API for AI-curated financial insights.
- Secured **1st Place – Visa Track** by presenting a scalable fintech solution to industry executives.

Facial Emotion Recognition | *Python, TensorFlow, OpenCV*

Apr. 2024

- Implemented a real-time emotion classifier using **facial landmark detection** and a Deep Neural Network.
- Boosted model performance to achieve a validated **60% prediction accuracy**.

STEM Activity Coordinator (Lawrence Boys and Girls Club)

Aug. 2023 – Jun. 2024

- Facilitated STEM workshops for 30+ youth, designing hands-on curriculum in circuits and robotics.
- Coordinated with Director of Education to acquire and plan new activities to build STEM engagement.

TECHNICAL SKILLS

Languages: Python, C, C++, Java, SQL, JavaScript, TypeScript, HTML/CSS, Bash, LaTeX, Verilog, R

Tools & Web: React, Vite, Node.js, Git/GitHub, Linux/Unix, VS Code, Figma, Google Stitch

AI: OpenCV, PyTorch, TensorFlow, Prompt Engineering

Hardware: Circuit Design, Arduino + Raspberry Pi, Magnetic Induction, Soldering, FPGAs
